Business problem

Sebastian Folkes facing challenges with stakeholder management of Roehampton Hospital

Challenges extended under the concern of Sebastian Folkes regarding the lack of funding and support workers in the hospital

Respective planning will be shared with Sebastian Folkes under the determination of the concern represented

Understanding the concern of the client Sebastian Folkes, challenges faced by the client towards stakeholder management, lack of funding and support workers in the Roehampton Hospital. Part of the work is necessary to provide proper planning which is essential to mitigate the challenges faced by the client (Laurie and Mortimer, 2019).

Analysing the challenges with the stakeholder management of the hospital creates a huge impact towards the various facilities provided to the patients. Lack of funding and lack of support workers impacts the job performances and work stress levels, hence, proper project pricing is essential.

Project Planning provided high strategic incorporation in solving issues (Gong et al., 2022)

Proper pricing planning and project planning help to reduce the challenges which are been faced by the client and provide a respective solution for the strategic decision-making process.

The proposed approach to address the business problem

Interaction and communication with the stakeholder management help to resolve the issue (Lehtinen and Aaltonen, 2020)

Implementing a cost resolution strategy helps to provide resolution on funding

Hiring people through artificial intelligence

Approaching the hiring system of the supportive worker through artificial intelligence helps in the identification of the right person for the right place. It helps in the identification of necessary skill and approaches of the support worker working in the hospital and it also analyzes the necessary<sup>1</sup> requirement such as cost resolution strategy implementation and provide respective result.

Deliverable and anticipated outcomes link to client briefs and approaches

Approaching the whistle-blower strategy helps to provide a resolution towards the issues of lack of funds in Roehampton Hospital

The cost resolution strategy provides the least expensive to the deposit in error with a possible resolution method

Management training is necessary with respect to<sup>2</sup> hiring proper people as a support worker

Underrespective issues of the client observed that failure also happened while working by the client Sebastian Folkes at NHS Trust and concern arises at the time of application of the transformational programme for identification of the issues. Hence, the usage of the McKinsey approach is reliable.

Analysing cost resolution strategy helps the client to identify the necessity of financial aspects in the hospital

McKinsey's transformation approach provides a strategy to the client for building sustainability and providing impact (Liao and Wang, 2021)

Management Training helps in gaining more support in the process of hiring people.

The cost resolution strategy helps to identify the least expensive products through which more expensive products can be reduced and the least expensive product resolution Method can satisfice.

## Project Plan

Project Name: Business Issues in Roehampton Hospital Project ID: XYZ123

Client Name: Sebastian Folkes

Start Date: 12/01/2023 End Date: 12/06/2023

Sl.No

Approaches

Action Taken

Progress report

(0-5)

Team members Involved

Time required

1

Mckinsey transformational approach

It delivered the strategies upon the financial, Operational, employee, environment and many more approaches. implementation of the strategy provides sustainability in the business hence it is necessary to implement it in the management of the hospital

3

CEO, Senior management, take holders, and clients.

4 months

2

Stakeholder theory

The incorporation of stakeholder theory provides a view where stresses are interconnected with the relationship between the business and the consumer through which proper values can be given to the stakeholders.

4

Senior management, clients and employees

6 months

The stakeholder theory is useful as it engages with Principles of governors, principles of externalities, principles of contract cost, principles of agency and limited immortality. It is essential that the client can understand the consequences of the stakeholder issues and provide proper resolution.

Project Team

Delivery of proper outcome to the respective team is project manager, deputy project manager, project financier, project lead and executive supporters

The involvement of the various other member helps in completing the project in a given time

System engineer and project lead help in explaining the different natures of the project

In proposing the project lead take the responsibility of elaboration on the issues faced as a part of the financial crisis and respectively propose the necessary upbringing of the project work. The team members are going to investigate the data with access from the hospital trust and apply approachable implementation such as theories and models and frameworks to overcome the issues regarding the financial aspect as well as the lack of storing and hiring process.

The team members who are been sectioned take care of the groundwork and the lead and the quality managers help to outline the necessary steps of work happening in the project.

Project Pricing

The cost-plus pricing model is engaging in the project

The hourly pricing model is engaging

The performance-based pricing model is engaging

The role of the cost-plus pricing model helps in analysing the setting of the price by using powerful strategies. It enhances calculating the total cost of the materials and necessary aspects which are required for operation and provides a limited budget for any kind of operation. The hourly pricing mortal and performance-based pricing models are helpful in terms of limiting the financial aspects and also provide influence to the new Employees which are hired in the organisation.

Successful completion of training and applications

50

Implementation of this strategy helps in analysing with improve behaviour towards the work, providing ideas for managing the finance and completion of training and application of proper changes helps to increase productivity and reduce the issues

The assumption to underpin the proposal

A research approach to accessing data helps in planning and implementing proper procedures (Das and De, 2023)

The risk analysis happens due to implementing an hourly-based pricing model  
Government rules and regulations can carry more risk

Roehampton Hospital runs under a trust where the connection of healthcare to the local community across Southwest London is presented. Due to the connection with trust, there are various rules and regulations which are applied by the government are required to carry out and various changes create various risk factors for increasing the issue such as financials. From the case study it is identified that due to financial and funding disruptions police cases and investigations are approached by the CEO of the hospital however it harms the reputation of the hospital which is one of the major risk factors.

## Positioning the firm

The consultancy provides a fresh outlook and viewpoints to the client to overcome the issues

The purpose of the consultancy project is to provide knowledge and intellectual inputs for the enlargement of the purpose of the organisation

It enriches with problem-solving techniques and strategies which are useful for the organisation

From the case study it is easier to analyse that a huge financial crisis and disruption has been achieved in Roehampton Hospital and to mitigate the issue the new CEO has approaches with transformation planning and programming. However due to government involvement the issue is taken under police investigation and various consequences have created risk factors. Hence, the client Sebastian Folkes has approached the consultancy to mitigate the various issues involved in the hospital and through proper planning and pricing strategies the consultancy has provided an approachable resolution.
