Dakar, Dakar, Dakar 1. Part A: Photo Essay on the Right to the City 1.1 Introduction
Dakar Senegal Senegal Dakar Senegal dakar The mobility service revenue has increased for more than 73.7 percent in Senegal due to the demand of mobility in cities like Dakar (Statista.com, 2023). The transportation of Dakar has become easier due to the presence of bus companies from every city of Senegal that reach Dakar. The bus and mini bus services of Dakar is one of the most popular forms of public transportation as it provides easy transportation. According to the views of Rossetti et al. (2020), accessibility of public transportation refers to the presence of vehicles to travel and transport. The maximum places of ⁴ **Dakar is the capital and most largest city** of Senegal that have helped to enhance the transportation system of Dakar. Dakar has urban problems caused by rapid growth of populations and illegal housing that have been encouraged to enhance the transportation system of the city. Besides, the improvised transportation system is helpful for Dakar to enhance the ³ **economic growth of the country as the capital of Senegal**. The geographical features of Dakar are effective to promote transportation due to the rolling plain lands of the city. According to Lesteven et al. (2022), the multiple types of public services such as healthcare services, fire extinguisher services and delivery services in Dakar play a vital role to improve the transportation services. The usage of easy and fast transportation is essential to enhance the public service in Dakar. Dakar, Dakar, Senegal. (Source: Tradingeconomics.com, 2023) Dakar, Dakar, floods and coastal erosion. According to the views of Ba et al. (2019), the rural areas of Dakar get affected due to natural calamities as these areas have issues regarding transportation systems. The transportation issues, Dakar. The physical features of Dakar, Senegal are suitable for mobility and service access in the urban area of Dakar (Britannica.com, 2023) The identified big issue in Senegal, mainly in Dakar, is the increase of population that has created issues regarding the maintenance of the city. It is estimated that nearly 14 million residents of Dakar live in the crowded slums of Senegal and about 53.260% people have no kind of basic shelter to stay (Africapolis.org, 2023). It is prominent that a huge number of people of Dakar, Senegal are affected due to the homelessness. Roughly 31000 cases of casualties have been reported in Dakar due to natural casualties such as flood and soil erosion (Statista.com, 2023). The average rate of death of homeless people in Dakar is 100,000 among the population of homeless people (Statista.com, 2023). Therefore,

the huge population in Dakar is the main reason behind the huge rate of homelessness in Senegal. Figure 3: Population growth in Dakar

(Source: Statista.com, 2023)

Approximately 20.74% Income insecurity is a huge problem that has increased homeless people in Dakar. As stated by Teye and Nikoi (2022), a lot of people in Dakar lost their shelter because of floods and soil erosion. On the other hand, according to Singer and Rylko-Bauer (2021), the other problem faced by homeless people of Senegal is healthcare insecurity. Dakar. Dakar is not that economically developed, hence, the government of Senegal cannot provide free healthcare services to the homeless people in Dakar Lahti (2019).Senegal, Dakar , The homelessness in Senegal include issues regarding the healthcare of street children due to lack of health security and maintenance of hygiene (Alegbeleye and Mohammed).Senegal,Dakar. This report contains the ongoing issues regarding the constructions of Dakar in Senegal. Furthermore, this chapter contains the issues of urbanisation that are effective to ensure the increase of the rate of housing in Dakar. Besides, this report contains issues regarding slums and housing in Dakar. Hence, the homeless people of Dakar cannot afford food that increases the rate of malnutrition and health issues among the residents Raimi et al. (2021). as stated by Kaushik (2022),

huge number of homeless people, Senegal, Senegal. Dakar,Dakar, Dakar.

These all factors can help to change Dakar into an ideal city in Senegal.

Dakar needs to focus on the share principle for the development of the city to ensure the growth of the economic structure

These all are important for the modification of the city of Dakar as these factors are essential to provide structured improvisation for the city.

Dakar, dakar

The rate of criminal activities and road traffic accidents are the major issues of Dakar due to the increase of homeless people on the roads.Dakar. Dakar, dakar, dakar. According to Peralta Quiros et al. (2019), Dakar needs to concentrate on the employment matter because a proper employment rate can help a city to be an economically successful city.

She stated for the city of Dakar that this city needs to increase the development rate in different types of parts because Dakar is a less average developed country in Senegal.Sarker and Pervin (2020), dakar, dakar, dakar, dakar. Warner (2022),

dakar, dakar. Dakar, senegal , dakar, dakar dakar, dakar dakar, dakar Figure 4: Land/Flat priced in dakar (Source: Statista.com, 2023), dakar. However, Dakar has been identified to be the fastest-growing African city with a population of 3,429,536 in 2023 (Worldpopulationreview.com, 2023).Faye and Du (2021),Pouye et al. (2022). According to Meyer and Auriacombe (2019), driving market changes, and security challenges because of migration are key factors that have boosted the issue of urban governance policy lack in Dakar. Dakar, Akanle and Omobowale (2022)Dakar City Corporation Ordinance is the only governance policy for urban regulation in Dakar Carré *et al.* (2020). Dakar. Dakar, **Figure 5: Literacy rate in Dakar**, (Source: Ceicdata.com, 2023). Diouf *et al.* (2019), As commented by Oliinyk *et al.* (2021), the lack of skilled management creates issues regarding the work process as it creates barriers to enhance the quality of the work process. The urbanisation in Dakar requires a skilled management process to mitigate the issues regarding the increasing numbers of slums and squatters. (Statista.com, 2023) Dakar As per the view of Hammad et al. (2019), environmental issues have a negative effect on a city and on the health condition of its people. In 2020 Senegal has reported a downfall of 29.43% in the employment rate in agricultural industry (Tradingeconomics.com, 2023).Dakar, Senegal this place Climate change issues in Dakar have failed the humidity level, increased temperature and also decreased summer rainfall that have affected the health conditions of the citizens in Dakar city. (Statista.com, 2023).**Figure 8: Changes in temperature in Dakar.** (Source: Statista.com, 2023) Benegiamo (2020) increased land scarcity in Dakar, Senegal has reduced a significant low access to lands impacting the agricultural industry significantly.Dakar, Senegal

The cultural aspect of the city significantly Dakar, Senegal About 5000 wastes have been generated in Dakar on a daily basis and only 37% of these are managed in appropriate manner (Global-recycling.info, 2023). Dakar, Senegal as it has been affecting the construction process within the city Dakar. Senegal, human resource

that has been impacting the sustainability approach of the cities within this place.. Dakar is ⁵exposed to high levels of air pollution and this has increased breathing difficulties and risk of infection among citizens. The real time air quality in Dakar is about 140 AQI which is very poor (Statista.com, 2023) Air pollution in Dakar has increased the risk of death and disability in Dakar by about 17.6% in 2022

(Statista.com, 2023). Carbon dioxide emission into the atmosphere in Dakar is about 0.5 metric tons per capita in 2020 (Ourworldindata.org, 2023). Figure 9: Carbon dioxide emission in Dakar, Senegal (Source: Ourworldindata.org, 2023). This helps Dakar also to combat climate change and environmental issues. Senegal has adopted effective legislation that is effective to enhance the usage of suitable powers to ensure sustainability of nature that is effective to ensure the success of the city. Dakar, Senegal dakar, dakar. Dakar City Corporation has focused on adaptation of an effective waste management system in which this city focuses on door to door community based waste connotation from households (Dieng et al. 2022). **Figure 10: Waste management framework in Dakar.** (Source: Ourworldindata.org, 2023) Senegal has adopted a "clean air and sustainable environment project" to improve air quality in Dakar and also in Senegal (Bassi *et al.* 2022). Dakar, Senegal as it has been affecting the cost of living within this place creating a major challenge for civilians. Dakar, Senegal dakar, dakar, senegal (Tradingeconomics.com, 2023) Benegiamo (2020).

It can be concluded that slums in Dakar, Senegal have been facing significant residential issues. In addition, it has also been identified that a poor living atmosphere has been reducing health conditions of individuals living within this place. Furthermore, Dakar has also been facing a significant issue of urbanisation due to which cost of living has been affecting economic aspects within this place. Ineffectiveness of governing policies within this place has been affecting growth and development reducing the participation rate of civilians. environmental issues and deteriorating health conditions of individuals has been resisting growth of this place at a significant rate. It has been identified that carbon emission and burning biomass has been identified as two major significant issues restricting health conditions of people within this place. Thus, it can be stated that because of these issues this city of Senegal has been facing a significant crisis in enhancing growth and development effectively.

It has been identified that the poor condition of living in Dakar, Senegal has been restricting people in improving health conditions affecting progress and sustainable development.

It has been identified that mobility of this city has been a positive aspect for this city assisting it in improving success and effectiveness for individuals residing within this place. Dakar Dakar Thus, people in Dakar, Senegal have developed a democratic

atmosphere that has been assisting them in improving sustainable places with increased equal rights.

Encouraging collaboration can assist Dakar, Senegal in improving sustenance and harmony that can assist this place in enhancing prosperity and equality accordingly.

Low maintenance governance policies within Dakar, Senegal have been restricting citizens in abiding practical laws and sustainability while receding within this place.

Factor influencing lack of governance policies in Dakar.

Thus, despite having an opportunity of living in an urbanised city, high cost of living has been resisting the people of Dakar in Senegal facing a significant economic crisis.

However, due to increased cost of living, people of communities in Dakar have been resisting the approach of progress and prosperity affecting financial and economic development.

Due to this major aspect, people in this place have been unable to engage with the agricultural industry resisting success and effectiveness. Lack of emergency management has been restricting healthcare workers in providing proper guidance towards needful people affecting sustainability and success at a significant rate.

Three major environmental issues which Dakar, Senegal is facing are climate change, mismanagement of solid wastes and air pollution. Due to these major climate issues, people in Dakar have been facing complexities in maintaining physical, emotional and psychological health conditions. Moreover, DCC has also focused on an informal waste recycling system to recycle solid wastes. This innovative initiative has been assisting people in Dakar city in combating issues of pollution at a significant rate. Thus, by attaining a healthy living condition, people in this place has been able to improve their health conditions at a significant rate. The right to the city is an effective process that helps to enhance the experience of the citizens regarding the construction and environmental factors of the city. the Government of Senegal needs to identify the economical, political, educational, and ecological state of Dakar to ensure the success of the city. The city right is the factor that is helpful to maintain the city environment that is essential to enhance the health factors of the citizens. Besides, the right to the city is a process of maintaining a sustainable city that is essential to enhance the health factors and economic factors of the citizens. The usage of city rights is helpful to enhance the transformation of cities such as Dakar. The homelessness of Dakar causes issues regarding the

maintenance of the city as the increasing rate of homeless people includes issues regarding the damage of government properties.
